

SAYS JEALOUSY IS REASON FOR YEE'S TROUBLE

Another Man Wanted the Girl He Was to Wed, Declares "White Slave" Affidavit

Jealousy, as well as "through falsehoods and fraudulent acts," on the part of one Park Young Sur, led to the arrest by the federal authorities on November 6 of Yee Sung Chih, who was indicted on a charge of having violated the "white slave" act, according to the affidavit of a Korean named Kim Chung Sik which was filed in federal court today by E. J. Botts, attorney for the defendant Korean.

In connection with the arrest of Yee Sung Chih, the name of one Dorothy Kim, a Korean girl, was mentioned, it being alleged by the police and by the U. S. marshal's office that when Dorothy was 13 years old her grandfather sold her to Yee for \$5 and that, since that time, the two have been living together as man and wife. It is further alleged that Yee recently tried to sell the girl to another Korean for \$150. The complaint against Yee to the federal authorities was made by the grandmother.

The affidavit filed today, however, throws alleged new lights on the case; one of these being that on November 3 Yee Sung Chih and Dorothy Kim secured a marriage license from Palmer P. Woods, Attorney Botts had the license in his office today. Another is that a Korean named Park Young Sur, who was in love with Dorothy, sought to have Yee arrested when Dorothy consented to marry Yee, although she favored Park. It was to please her parents that Dorothy consented to marry the defendant, Attorney Botts said today.

The affidavit of Kim Chung Sik, who alleges he is a personal friend of the defendant, says, in part:

"That affiant has been for six or seven years a close friend of Dorothy Kim, having resided in the same home with her and her parents for all of said time.

"That affiant is informed and believes and so alleges that the said Park Young Sur, angered and disappointed over his failure to win in marriage the hand of Dorothy Kim, did unlawfully and knowingly and with intent to perpetrate a fraud upon the government, and to forestall the marriage of said Yee Sung Chih and said Dorothy Kim, cause the said Yee Sung Chih to be arrested and thrown in jail on the day set for his marriage to Dorothy Kim.

"That the rivalry for the hand of said Dorothy Kim between Park Young Sur and Yee Sung Chih has been a subject of common report and gossip among Koreans of Honolulu, that it was generally known that the parents of Dorothy had advised and persuaded her to marry Yee Sung Chih and that though she personally wished to wed Park Young Sur, she had consented to marry Yee Sung Chih to please her parents.

"That subsequently the marriage of said Yee Sung Chih and Dorothy Kim was set for the 8th day of November, 1915, and the parents of Dorothy Kim thereupon invited all their Korean friends to be present and to take part in the marriage festival and feast."

Following the filing of the affidavits in federal court the defendant Yee was released on his own recognizance. Captain of Detectives A. McDuffie said recently that, according to information he has received, Yee is a professional gambler and often took Dorothy with him on visits to the other islands.

EXPECT TWO HUNDRED FOREIGN WAR VETERANS AT MEETING TONIGHT

At the second meeting of Hawaiian Post No. 34, Veterans of Foreign Wars, which is to be held at the armory tonight, the charter of the new organization will be closed, and it is expected that more than 100 names will be added. Twenty-two signed the charter at the first meeting.

According to Adjutant C. J. Edwards, more than 200 men have sent notice in writing or over the telephone that they expect to attend the meeting. Many of the prospective members are now in the army and are also members of the Spanish War Veterans, with which the Foreign Wars Veterans does not conflict in any way.

A committee will be appointed tonight to find out whether the armory can be secured as a regular meeting place for the organization, and what the rental will be.

Prof. T. A. Jaggar, Jr., director of the Volcano Observatory, arrived today from the island of Hawaii en route to the mainland. One of the main objects of his trip is to urge upon members of Congress the setting aside of the proposed Kilauea National park reservation.

YES—IT IS POSSIBLE TO STOP RHEUMATISM

Rheumatism is a tormenting and stubborn malady. In some cases it yields to treatment which is without avail in other cases.

The darting pains, lame muscles or stiffened joints only disappear by gradually expelling the uric acid, and so many thousands have been relieved by the blood-enriching oil-food in Scott's Emulsion that you should give it a faithful trial. Scott's Emulsion acts as a powerful blood-purifier by increasing the red corpuscles and it strengthens the organs to carry off the acids which cause the trouble.

Try Scott's Emulsion. It cannot harm. It has helped thousands and may be exactly what you need. No Alcohol.

TAYLOR SEES HOW TO MAKE SAVING ON MAOLE DITCH

(Continued from Page 1)

Waikiki side of the Nuuanu valley into the Luahua gulch.

The accompanying contour map on a scale of 200 feet to one inch shows the preliminary line of ditch with contours at five-foot intervals.

The final location of the proposed ditch will follow with easy curves near the present angular line, except the tunnel which will be on a direct line from the upper end of the ditch to the diversion at the Maole stream in Hillebrand glen.

The entire water-shed of the proposed ditch is within the boundaries of the government forest reserve. The approximate areas are as follows:

Hillebrand glen, 125 acres.
Nuuanu valley, 175 acres.
Making a total of 300 acres.

This water-shed extends from an elevation of 1000 to 2500 feet and about 50 per cent, or 150 acres, are heavily wooded on steep slopes.

The general conditions and topographic features of this water-shed are favorable for runoff.

The average annual rainfall from the rainfall records of the Nuuanu valley water-shed from Luahua manka is approximately 137 inches, based on the records of rainfall at Luahua, the Nuuanu dam and the Nuuanu pit.

While runoff bears a direct relation to rainfall, yet the amount of runoff is affected by many varying climatic and topographic conditions, such as the depth of soil, the vegetation, the total rainfall, its rate of fall, as well as the temperature of the air and earth.

The runoff of a given water shed varies also, due to slopes, the percentage increasing with the rainfall. From the area and character of the water shed tributary at Hillebrand Glen and the water shed of that portion of the Nuuanu valley under consideration, I estimate the average runoff to be as follows: One third at 40 per cent, one-third at 50 per cent and one-third at 60 per cent, making a general average over the entire water-shed of 50 per cent.

From the records of the U. S. Geological Survey compiled from the data obtained by L. A. Moore, observer, I find the following as a very good example of the runoff from a heavy rainfall in the Nuuanu valley:

In the month of September, 1914, the runoff in the Nuuanu stream measured at the Government weir below reservoir No. 2 wasteway, shows a total of 512.70 million gallons, with a maximum of 86 millions, a minimum of 4.77 millions and a monthly average of 17.1 millions.

The slopes of the ground along the line of the preliminary survey were carefully taken at each station.

The average of the slopes taken from stations 0 to 50, a distance of 5000 feet, is 23.13 degrees.

From as careful a study of the water shed, the rainfall and the runoff, as the time and data at hand would permit, I estimate the water shed to be 300 acres; the average annual rainfall at 132 inches and the runoff as 50 per cent of the rainfall.

From an average rainfall of 132 inches, or 11 feet, over the water shed in question of 300 acres, the runoff calculated at an average of 50 per cent, would yield approximately 539 million gallons per year, which is equivalent to a continuous flow of 1.48 million gallons daily.

A six (6) inch rainfall in 24 hours on a water shed of 200 acres under average conditions with a 50 per cent runoff, should yield approximately 244 million gallons, and a rainfall of eight inches under similar conditions would yield approximately 38 million gallons.

As there are records of rainfall in excess of eight inches, it would seem wise to provide for a maximum flow of at least 35 to 40 millions.

The conduit should be so designed and constructed as to have a maximum carrying capacity for the largest runoff from the heaviest rainfall.

The bottom and sides of the ditch should be cemented (to a sufficient height to carry the normal flow), or low stages of runoff and delivering the same to the reservoir without loss, except that due to evaporation in the open ditch.

The various inlets from the natural drainage should also be protected by concrete work to prevent washing in times of heavy rains or freshets.

The final location of the proposed conduit should be made with complete plans, specifications and estimates of cost for the construction of the proposed conduit on the general lines given in this preliminary report.

There is no doubt that the project is not only feasible and desirable but will prove to be a profitable investment.

The tunnel will be approximately 600 feet in length and the estimate of cost including the lining of the bottom and a portion of the sides.

This tunnel will shorten the total length of the conduit by 700 feet.

Estimates.
This estimate, based upon the preliminary survey of the proposed conduit will probably be reduced upon a careful location and estimate of quantities, cement work, etc.

Preliminary Estimate of Cost.
Clearing right of way.....\$ 400
Excavation, 5700 ft. ditch.....\$100
Tunnel 600 feet, @ \$8.00.....\$4800

CANNED MEATS FROM ORIENT NOT ALLOWED ENTRY INTO TERRITORY

Several large shipments of canned meats from China and Japan, intended for local consumption, have been refused entry into the territory by A. W. Hansen, federal food commissioner, because they were not accompanied by proper meat inspection certificates.

This is one of the results of an exhaustive examination which has kept Commissioner Hansen busy at the custom-house during the last several months. In the matter of canned meats an inspection certificate is proof that the animals from which the meat was taken were subjected to ante and post mortem examinations by veterinarians of ability in the Orient, who are accepted by the United States government as being competent. Commissioner Hansen said today.

"Every shipment of meat products coming from a foreign country must be accompanied by certificates signed by the American consul at the foreign port of shipment," the commissioner continued, "which show that the product has been properly inspected."

The inspection of the shipments in question was made since the first of this month. In some cases goods have been held here for more than six months awaiting the outcome of efforts by the consignees to secure the proper certificates. The shipments which are now refused entry consist largely of the following products in cans:

Beef and pork from Hongkong and Canton, China, and from ports in Japan; beef and bamboo sprouts from China; beef known as "beef yamaton," which is meat put up in a soy sauce, and dried sausages.

The majority of these products go to the local plantations, where Chinese and Japanese are employed in large numbers. Some of them, however, are sold openly in Honolulu.

"If Doctor Wadman has any facts regarding the matter, let him present them to the board," said F. D. Lowrey, chairman of the board of liquor license commissioners today, referring to a letter written by Dr. J. W. Wadman, superintendent of the Anti-Saloon League, to the board, alleging that fights and general disorders are common at the Lelehu "bees" garden.

Doctor Wadman's letter, as published in the Star-Bulletin last Saturday, gives no facts, but only a general statement of things told him, continued Chairman Lowrey.

In writing to the board, Doctor Wadman should give us the exact facts, instead of merely saying that the matter is commonly known," the chairman added.

Cement lining, 6400 feet, @ \$1.50..... 9600
Diverting dam at Maole stream..... 1200

Total.....\$21,700
Engineering superintendence and contingencies, 15%.....\$ 3255

Grand total.....\$24,955
Comparison.
This estimate is approximately 25 per cent less than the plan of tunnel and pipe lines as proposed by the city engineer at a cost of \$33,500.

The ditch has the great advantage of conveying all the flood waters as well as the normal flow, without loss by seepage. It also drains approximately one-third more watershed, and as the ditch is to be lined with cement it will be of a more permanent nature.

The value of 539 million gallons of water delivered at an elevation of 1028 feet above sea level into the Nuuanu reservoir is certainly worth at least \$5000 per annum for power, domestic and irrigating purposes.

The total cost of the proposed conduit is placed at \$24,955. On this basis the first cost of the conduit would be realized in five years time, from the date of its completion.

Water Power.
The present electric lighting plant in the Nuuanu Valley at Reservoir No. 1 obtains its power from two pipe lines 18 and 30 inches in diameter.

The 18-inch steel pipe line was laid from Luahua weir to reservoirs numbered three and two and to the power house at the city electric light station in the Nuuanu Valley at Reservoir No. 1.

The 30-inch pipe line from Reservoir No. 4 to the same power house has a total length of approximately 10,250 feet, of which 1950 feet is wooden stave pipe and 8300 feet of steel lock bar pipe.

Six thousand one hundred and fifty feet of the 30-inch lock bar pipe was laid in the year 1907. The lower end of the line, or 1850 feet, was laid in 1908, and water turned into the pipe line for testing in April, 1908, and was accepted in July, 1908, after careful testing and caulking.

This pipe line furnishes a head of over 600 feet for power purposes, therefore the water stored in the Nuuanu Reservoir No. 4 (which has a rated capacity of 625 millions) has a double value, first for power and second for domestic and irrigation purposes.

Seepage.
The question of seepage from Nuuanu Reservoir No. 4 should be investigated to determine the approximate percentage which is lost entirely and the percentage which is diverted at the Luahua weir as return waters by percolating from the reservoir basin.

MORNING ON 'CHANGE
Though Olaf still leads the market in point of activity, it is stationary at 7 7/8. Other of the big issues are advancing in sympathy with the advance in the price of raw sugar, however.

Onion having touched 40 on heavy purchases this morning, while Kokaha, which last changed hands at \$157.50, sold today at \$170. Waiialua has climbed fractionally, and sold at \$25, with neglected later offerings one eighth under that figure.

A jury recently acquitted, on all counts of the indictment John Cameron Miller, who was arrested on the charge of defrauding the Colombian government on postal payments.

The rivers of the United States are wearing down its lands at a rate of about a foot in 120 years.

CLAIMS HUSBAND USED HORSEWHIP

The pitiful story of nearly eight years of alleged abuse suffered by a woman who, in the interest of her five children, endeavored to maintain her home until she could endure conditions no longer, is told in an amended complaint in divorce filed in circuit court today by Matilda Do Rego against Manuel Do Rego.

Five children issued from the marriage, says the amended complaint. They are Manuel, 8 years old; George, 7 years old; Helen, 4 years old; Lawrence, 2 years old, and Fred, 1 year old. Aside from having beaten the wife on numerous occasions the wrath of the father has been turned upon at least one of the children, which was beaten with a horse whip, declares the complaint.

In the first place, the libel points out that, although sufficiently able to do so, Do Rego has neglected and refused to contribute to the support of the libellant and her minor children, of which there are five, for more than 60 days prior to September 13. But this is only a mere beginning. The woman fills five typewritten pages with stories of alleged abuse of both herself and the children.

"During the last mentioned period," says the complaint, "your libellant has been forced and compelled to seek food and clothing from her relatives and friends for libellant and children."

Continued inhuman treatment is alleged to have occurred over a long period of years, culminating in the man's beating one of the children with a horse whip. When the mother interfered, declares the complaint, the man turned upon her, and though it was only two days before their fifth child was born, he beat his wife over the head and body with the horse-whip.

Several other charges, unit for publication are brought against the man in the complaint. The woman asks for temporary and permanent alimony and attorney's fees.

VESSLS TO AND FROM THE ISLANDS

(Special Wireless to Merchants' Exchange.)

Monday, Nov. 15.
MURORAN—Sailed, Nov. 9, S. S. Arab (ex-Str. M. S. Dollar) for Honolulu.

PORT ALLEN—Arrived, Nov. 15, Bt. Kaphan, from Newcastle, (passed Honolulu Nov. 14, 4 p. m.).

SAN FRANCISCO—Arrived, Nov. 13, El Segundo, hence Nov. 5.
Arrived, Nov. 14, 10 p. m., U. S. A. T. Logan, hence Nov. 6.

HIO—Sailed, Nov. 13, 4 p. m., S. S. Hyades for San Francisco (not as before reported).

Radio Messages.
S. S. LURLINE arrives from San Francisco Tuesday. Passengers—49 cabin and 18 steerage; mail, 475 bags; cargo, 4900 tons Honolulu, 892 tons Kahului; autos for Honolulu, 15; express pkgs., 66.

S. S. SEATTLE MARU arrives from Yokohama Wednesday morning. Passengers, 1 cabin and 48 steerage; proceeds about Thursday morning for San Francisco.

POLICE COURT NOTES

For the fifth time Mary Flora and Mary Freitas, next-door neighbors, today each swore out a warrant against the other on a charge of assault and battery. It developed on examination that lottery tickets had part in the affair, and they were both charged by the city attorney with having a ticket in possession. The result is that they will each be tried on two charges tomorrow morning in the police court.

What looked like a simple case of fatigues on the street will end, it is said, with interesting evidence regarding the "woman in the case" when L. H. Rogers is tried next Monday for assaulting F. C. Cleghorn Saturday night at the corner of Port and Hotel streets.

Cleghorn this morning in the police court pleaded guilty and was fined \$5 and costs. Rogers was expected to do the same, but instead announced that he had engaged Lorin Andrews as his lawyer and asked a postponement until he could prepare his case. The elaborate preparations to avoid a fine of \$5 led to speculation and later Rogers said that there was family trouble back of the case.

Rogers said that he did assault Cleghorn twice, once in his home when he came in and found him there, and again on the street.

For the fourth time Charles Kaiaki is under arrest on the charge of selling liquor without a license. Kaiaki previously has been convicted once and another case against him is pending in the circuit court.

Yesterday W. P. Fennell and Charles F. Chillingworth searched Kaiaki's place in a tenement on Liliha street and found a bucket filled with ice and bottled beer and a bag of bottled beer. Previously a bottle of wine was bought at the place by W. Silva and Silva will be a witness against the defendant.

Saturday night the police employed a man to go to Kaiaki's and buy some liquor, hoping thus to get evidence. The man was a Portuguese. He went up the stairs to the suspected man's place while below the police waited. In a few moments the Portuguese came out, but as he was thrown downstairs by Kaiaki he did not bring any evidence with him. The officers then gave up getting Kaiaki until Sunday, when the raid was made.

In Brazil, where the insects destroy wooden telegraph poles, the railroad uses worn-out rails for poles.

SON OF POLICEMAN ACCIDENTALLY SHOT DIES AT HOSPITAL

After fighting for life since Thursday, Ernest Meyers, two-year-old son of Policeman and Mrs. W. F. Meyers, died yesterday afternoon at Queen's hospital from a bullet wound in the throat, received when a revolver in the hands of his father was accidentally discharged. It was hoped the boy would live, but Sunday a change for the worse came early in the day.

This afternoon an inquest was held at the coroner's office. No funeral arrangements have been made.

After hearing the evidence of the father and mother of the boy, the coroner's jury brought in a verdict of death by accidental shooting. The inquest was very brief, facts in the case being plain.

The case of Fun Tan, charged with having opium in his possession has been continued until 2 o'clock next Saturday afternoon for plea. Attorney Paul Bartlett was appointed by the court as counsel for the defendant.

room of one of them, number 138, of which Captain Yasui is the skipper, on fire, doing damage estimated at \$500.

ARMY NOTES

2d Lieut. Freeman W. Bowley and Russell L. Maxwell of the Field Artillery, have been detailed for a four years' tour of service in the Ordnance Department, and have, while on this duty, the rank and pay of a first lieutenant.

Lieut. Bowley returned recently from Hawaii to the mainland, where he has been assigned to duty as a student officer at the Mounted Service School.

Lieut. Maxwell has been on duty with the 1st Field Artillery at Schofield Barracks. Pending his departure for his new station at Sandy Hook, N. Y., on the December transport, he has been assigned to duty in the office of the department ordnance officer, with station in this city.

David Lloyd-George, British Minister of Munitions, denied in the House of Commons that a New York firm had offered Great Britain 2,000,000 shells at \$17 a piece.
